Product categorie	Naam	Aantal	Check
Aardappelen	Aardapp. Schoon 450 gram	2	<input type="checkbox"/>
Slamelanges & Versierders	Coop Olijven Italamix 125 gram	1	<input type="checkbox"/>
Soepen	Cup a soup Erwt	1	<input type="checkbox"/>
Aardappelen	Aardappel Mini Kriel 450gr.	1	<input type="checkbox"/>

as you can see here a edited email which is sent to the admin. What we like to have is that as you see the marked column that is where we triggered the productcategory that it is shown next to the product from that category. But as you can see the category is not grouped together.. see the marked category Aardappelen.. how can i get this done and not in the way that the products are put into the cart?
